Forecast for Wednesday 09 Mar 2022

Weather: Dry overnight conditions but with occasional hill fog lasting until midday before a band of rain moves east across the area, affecting all hills through the afternoon. Rain initially falling as sleet or snow down to around 1000 m, but freezing levels will quickly lower from late-afternoon, allowing snow to fall to 300-500 m. Severe gale or storm force winds, especially on the higher peaks in the Cairngorms such as Lochnagar and Mount Keen, before quickly easing later in the day.

Chance of cloud-free hill tops above 800m: 50% overnight into Wednesday morning due to occasional hill fog, lowering 30% by early-afternoon as rain and hill snow move in, and 10% or less late-afternoon.

Low Cloud and visibility: Excellent visibility away from occasional hill fog, with patchy cloud with bases 600-800 m overnight. Visibility lowering moderate in rain through the afternoon, and very poor in snow or hill fog, with cloud bases widely 300-500 m, and occasionally 200 m.

Met Office Aberdeen Meteorologist's View

Snow and storm force winds combining to give extremely hazardous conditions through Wednesday.

Forecast for Thursday 10 Mar 2022

Weather: Areas of hill fog and rain and drizzle affecting a large area of the region until mid-afternoon, before clearing northeast to leave a drier end to the day with hazy sunshine in the west. Strong to gale southerly to southeasterly summit winds strengthen with severe gales through the evening.

Maximum wind: Southerly to southeasterly winds strengthening through the day, peaking mean 30-40 mph gusting 45-55 mph through Thursday evening.

Chance of cloud-free hill tops above 800m: 10% or less morning and early-afternoon due to widespread hill fog, improving 75% from late-afternoon.

Low Cloud and visibility: Very poor in hill fog with cloud bases 150-300 m during the morning and afternoon, improving good through the afternoon away from isolated hill fog, with patchy cloud bases 700-900 m.

Temperature: **Glens:** Plus 1 celsius increasing to plus 8 celsius.
At 800m: Minus 3 celsius increasing to zero celsius.
Freezing level: 600 m early hours, increasing near summits by morning, lowering 600 m later.
